

**RIDEENGINE**  
SEASON FOUR

# RIDE WHAT YOU CAN'T.

## TWENTY NINETEEN

We've been told what to do our entire lives. Follow convention, play it safe, wait your turn, be on time, stay between the lines ... Life is full of rules. Fortunately for us, we're not afraid to bend, or break them once in a while. In fact, challenging the status quo is what drives us to keep moving forward.

Ride Engine started in a garage in Santa Cruz. We didn't have much money, but we had a wealth of ideas and ingenuity. Over the past few years, we have grown and evolved into a industry-changing brand few people believed would ever happen. We have the naysayers to thank for that.

When we came out with the world's first hard shell harnesses, the doubters of the world told us it wouldn't work. "Why would you want a stiff harness," They said. "Nobody will buy it." Now, harnesses as we know them have changed forever and every brand in the industry has a hard shell imitation of Ride Engine's original Armor.

"Ride What You Can't" is our tribute to defying the doubters- to throwing the rules out the window and following your heart, wherever it may take you. Someone will always be there to say you can't do something. We're here to say you CAN.

This is how we ride. When someone says we can't- even if that someone is the voice in our own heads - we just try harder. We dive deeper, crash harder, push ourselves a little farther, take one more small step outside our comfort zone until, eventually, we're doing what someone said we couldn't.

## HARNESSES

Many brands reference the harness as an accessory. To us the harness is an essential. It's our primary focus, and we believe for good reason: The harness is the critical connection point between your body and your kite. Not only is it a primary safety piece, but an uncomfortable harness can ruin even the best session. This to us makes it a vital piece of equipment rather than an afterthought.

For the fourth version of our iconic Hard Shell harnesses, we focused tirelessly on new technologies to improve the harness that redefined the way a harness should look, feel and work.

The development process isn't always about what you can add or what gimmick you can market. Sometimes it's about taking a step back and looking at your successes and how to improve them. The central focus of our harnesses has always been the hard shell. We invented it, we stand by it and this year we revisited it and then we reinvented it.

Year Four of the Ride Engine Harness line brings a proprietary new shell technology that delivers added durability and better fit for longer more comfortable sessions for years to come.

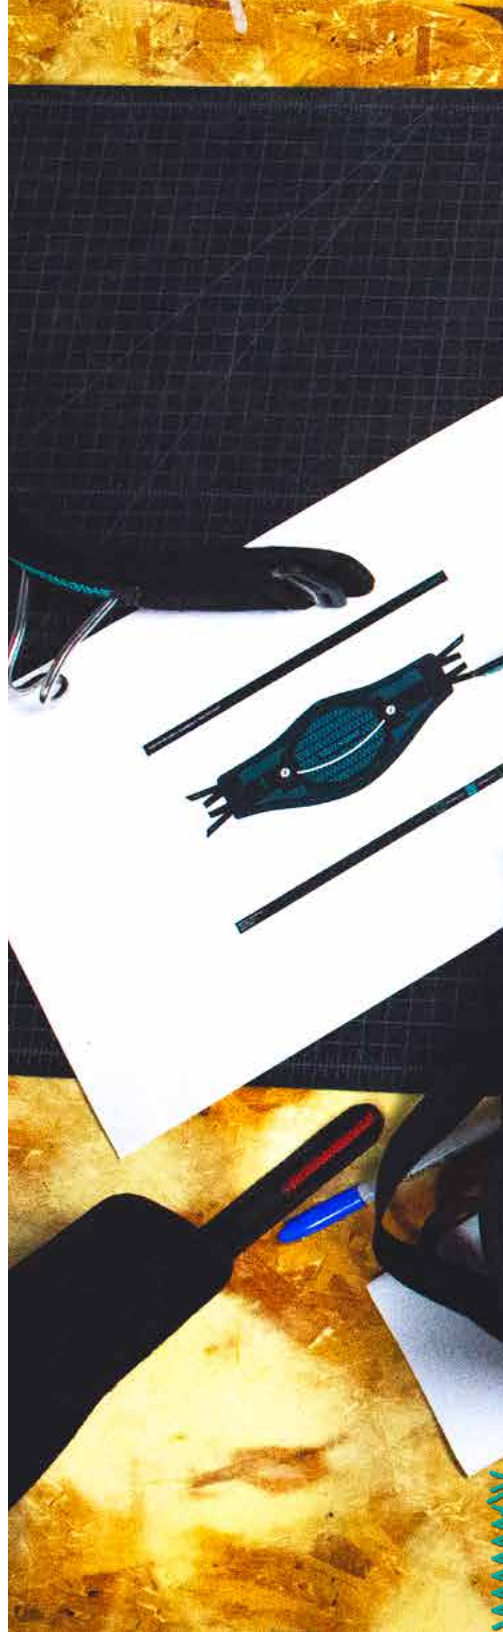

ENJOY THE RIDE!

RIDEENGINE

#RIDEWHATYOUCAANT

## INTRODUCING **SHELL SKIN**

Shell Skin technology is a new proprietary hardshell construction from Ride Engine. Years of development and testing various new shell technologies led us to this innovative construction.

This process gives the shell added durability in the form of: UV Resistance, Impact Strength, Abrasion Resistance, and Water and Tear Resistance. Not only will the Shell Skin give you new added durability to extend the life of your harness for years it also improves the overall fit and function of your harness. Enhanced ergonomics ensure that you get the maximum support where you need it from the most comfortable Ride Engine harness ever.

### ERGONOMIC FIT

- With a Ride Engine Hard Shell harness, contours and anatomical fit are locked. Other shell materials have the ability to warp and lose their shape over time. Our new proprietary shell material and construction locks the shell's contours and ergonomic shape in for the entire life of the harness.

- Shell Skin has the ability to vary the rigidity of the harness shell in key areas allowing it to follow the natural contours of the riders body. You get maximum rigidity and support where you need it most. But most importantly you get the best fitting most comfortable harness on the planet.

### DURABILITY

- UV RESISTANT - No fading and no material breakdown from the sun and salt water.

- ABRASION RESISTANT - Sublimated graphic and shell is resistant to scratching and surface dings.

- WATER RESISTANT - No delamination. No water logging. Material and construction prevents water damage.

- IMPACT RESISTANT - No cracking. No breaking. Shell is impervious to breaking from hard objects, misuse, or bad packing.

- TEAR RESISTANT - No breakdown from torsional twists or aggressive pulls from kitleoops.

RIDEENGINE

**ELITE** SERIES

Carbon fiber is light, stiff and incredibly strong- exactly the features we were looking for when we were building our first custom hard shell harnesses. We stitched and glued them together by hand in a garage, and if we had been given a sneak peek at what today's Elite Series looks like, we wouldn't believe in a thousand years that our creation would come this far.

## ELITE SERIES

- NEW** CARBON SEA ENGINE GREEN

### 1 SHELL SKIN **NEW**

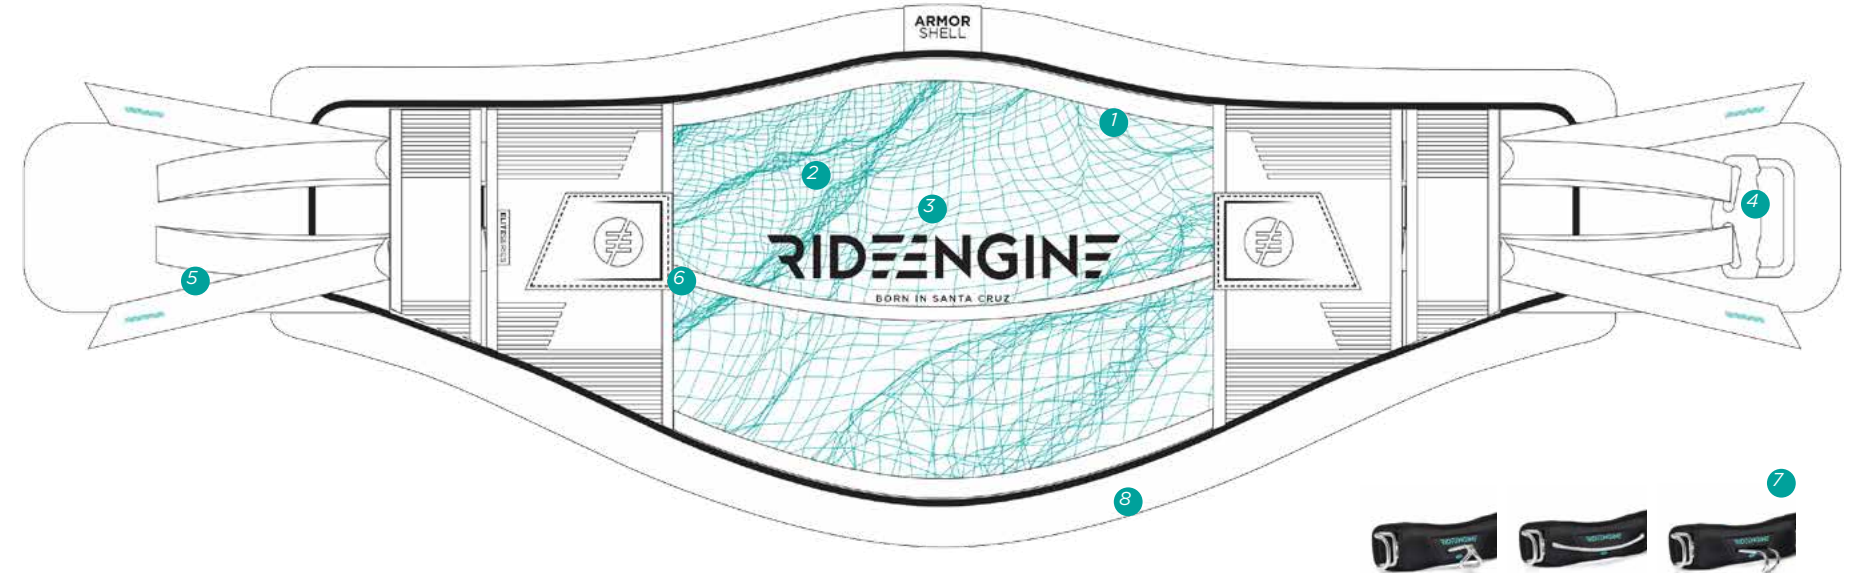

New Shell skin technology provides UV Resistance, Impact Strength, Abrasion Resistance, and Water and Tear Resistance. Not only will the Shell Skin give you new added durability to extend the life of your harness for years it also improves the overall fit and function of your harness. Enhanced ergonomics ensure that you get the maximum support out of your harness.

### 2 ARMOR SHELL

Industry's first hard shell harness, the Armor is light, strong and ergonomically contoured. Load is distributed seamlessly from the spreader bar to the armor shell, preventing harness from buckling or pinching.

### 3 LUMBAR LOCK

Harness conforms to lumbar, back and sides to lock securely in place. Harness won't slide from side to side or ride up.

### 4 SPEED LOCK CLOSURE SYSTEM

Back for 2019, the Speed Lock closure system returns with dual-zone webbing and a metal clasp to improve fit and tightening ability. This design prevents loosening as you ride, allows for easier tightening on the fly and lets you synch the harness even tighter.

### 5 ANTI-SLIP WEBBING **NEW**

New for 2019 is out softer more playable anti-slip webbing. This new webbing durometer makes the webbing easier to manipulate and improves tioghtening and fit adjustment. The softer webbing also prevents slipping and loosening of the webbing during session.

### 6 REMOVEABLE HANDLE PASS LEASH

Harness comes with easily removable handle pass leash mount around the back for freestyle riders. Harness also has two front-mounted leash attachment points for use when handle pass leash is removed.

### 7 INTERCHANGEABLE SPREADER BARS

Your harness. Your choice. Choose your sport and how you ride. We offer 3 spreader bars in 3 different sizes to ensure that you can customize your harness to your specific needs.

### 8 FUSION FOAM

Super soft and more egonomic foam core conforms to the shape of your torso for ultimate comfort and hold.

## PRIME SHELL SERIES

New for 2019, the Prime Shell series features a TPU laminated composite shell that is slightly more flexible shell than the carbon Elite Series. It still has all the stiffness, support and load-spreading benefits, but with a bit more give for riders who like a softer feel or don't care about premium carbon construction

## MEN'S WETSUITS

### WARMTH & STRETCH

- At Ride Engine we only use the highest quality and most environmentally friendly materials available to us. These materials make our entire wetsuit range lightweight, warm, soft, and stretchy. With this you will experience more freedom of movement while riding as well as more ease getting in and out of your suit.
- Thermalux Poly Fleece lining provides the maximum comfort and warmth in colder water conditions. This high quality pile is designed to keep you as warm as possible as well as dry quickly.

### FIT

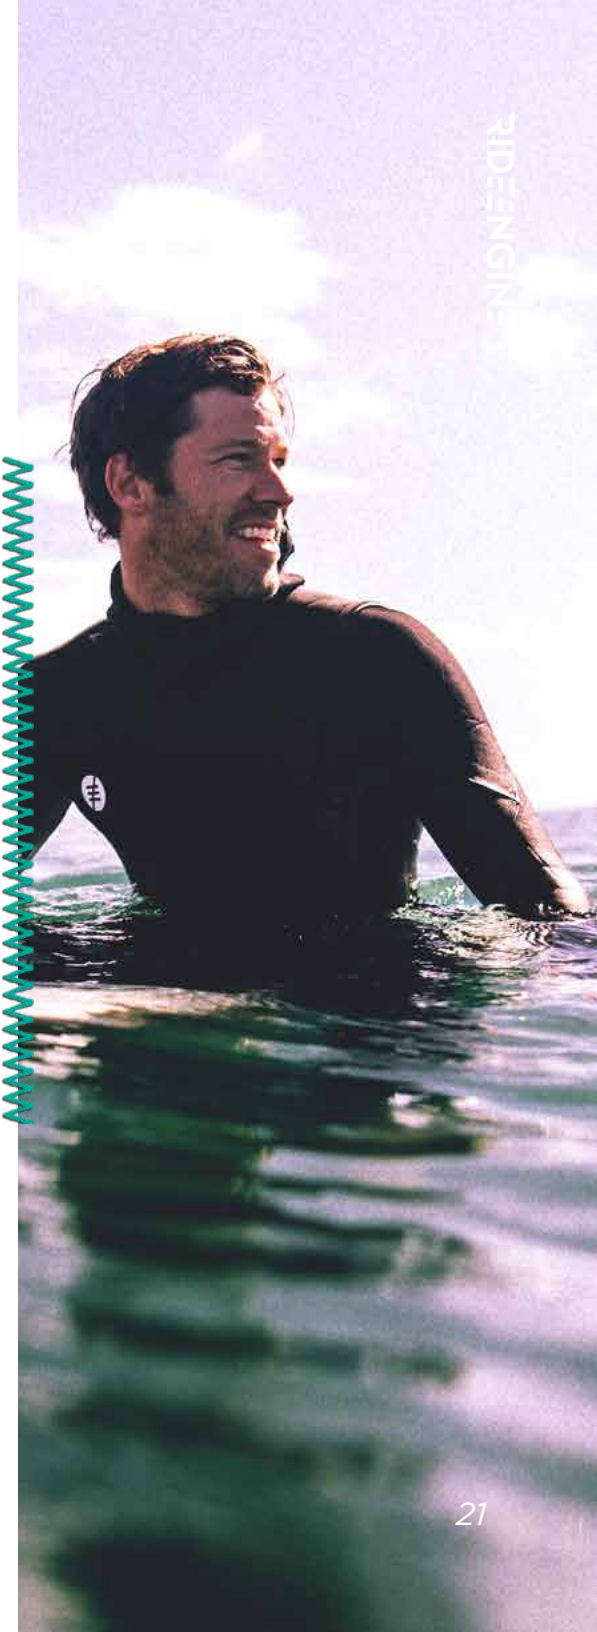

- No detail went overlooked in the development of our wetsuit range. Our strategic stitch pattern and panel layout was designed to allow for maximum range of motion while avoiding stretch points and minimize chafing.

### DURABLE & WATERTIGHT

- Flush resistant front zip construction closes up rather than down so it won't get unzipped when you take a beating.
- Our abrasion resistant holy knee panels cover the knees of all long suits for added protection where you will need it most.
- Interior grip strips line the wrist and ankles of all of our suits to help keep you suit in place and extra grip where you need it.

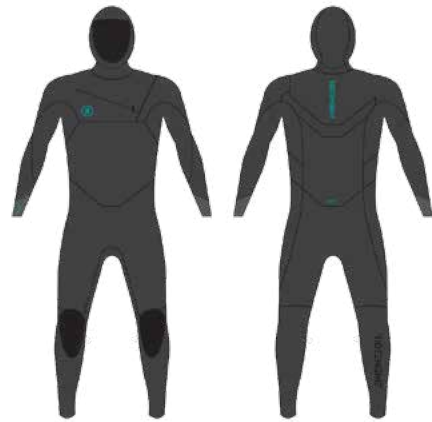

### ECO IMPACT

- Neospan s-foam Neoprene uses earth mined limestone to replace petro chemicals found in other neoprenes. It comes from nature and has less environmental impact.
- Carbon Black, one of the key ingredients of neoprene can now be pyrolyzed from rubber tires. This significantly reduces energy consumption and can cut down CO2 emission by up to 200g per suit.
- Our suits now use water-based glue in lieu of more harmful and volatile solvent based glue.

## TRAVEL BAGS

We've all felt the frustration of not being able to find that one crucial item when you need it most; or not being able to fit everything you need for a trip into your luggage; or even worse, arriving on location and realizing you forgot something important at home.

When you have as many hobbies and love as many activities as we do, the problem of staying organized and keeping all your gear in order is inevitable. We can't solve that problem for you, but our awesome selection of gear and travel bags will go a long way in helping.

TRAVEL BAGS

**ROVER PACK BACKPACK**  
21" x 14" x 5.5" ( 53cm x 35cm x 14cm )

- 26 L BACK PACK
- HIDDEN STASH POCKET
- PADDED MEDIA COMPARTMENT
- DUAL WATER BOTTLE POCKET

#36410002 / #36410001

**ROVER ROLLER SMALL**  
22" x 14" x 10" ( 57CM x 35.5CM x 10CM )

- 50 L ROLLER BAG
- ADJUSTABLE TELESCOPING HANDLE
- TWO COMPARTMENTS WITH NEOPRENE DIVIDERS
- 3 CARRY HANDLES

#36410005 / #36410004

**ROVER ROLLER LARGE**  
29.5" x 15.75" x 13.75" ( 75CM x 40CM x 35CM )

- 105 L ROLLER BAG
- ADJUSTABLE TELESCOPING HANDLE
- THREE COMPARTMENTS WITH NEOPRENE DIVIDERS
- TWO EXTERIOR COMPARTMENTS

#36410007 / #36410006

**TOOL PACK**  
8.5" X 12" X 2.5" ( 22CM X 30CM X 6CM )

- PADDED TOP AND BOTTOM
- MULTIPLE INTERIOR ORGANIZATION POCKETS
- CARRY HANDLE
- KEEPS SCREWS, FINS, HARDWARE, AND TOOLS SAFE

#36410008

**MOREAS BACK PACK**  
20" x 12" x 11" ( 51CM x 30CM x 28CM )

- 26 L WATERPROOF BACK PACK
- HEAVY DUTY PVC CONSTRUCTION
- FILL WITH ICE AND KEEP DRINKS COLD
- KEEPS WET GEAR CONTAINED

#36410003

**COMPRESSION BAG**  
-FIT TWO KITES IN ONE BAG  
-DURABLE RIP-STOP NYLON  
-PADDED SHOULDER STRAP  
-FOUR COMPRESSION STRAPS (TWO PER SIDE)

#36410010

TRAVEL BAGS

**SPACE AGE DUFFEL SMALL**  
26"x16"x16" ( 66CM x 40.5CM x 40.5CM )

- 105 L WATER RESISTENT DUFFEL
- KEVLAR REINFORCED BASE
- HANDS-FREE CARRYING WITH SHOULDER STRAP
- PACKS UP SMALL WHEN NOT IN USE

#36410011

**SPACE AGE DUFFEL LARGE**  
35"x19"x19" ( 89CM x 48CM x 48CM )

- 206 L WATER RESISTENT DUFFEL
- KEVLAR REINFORCED BASE
- HANDS-FREE CARRYING WITH SHOULDER STRAP
- PACKS UP SMALL WHEN NOT IN USE

#36410012

**TWIN TIP SLEEVE**  
4'10" x 17" x 1.5" ( 148CM x 44CM x 4CM )

- FIT WAKE/KITE BOARDS UP TO 148CM
- FULL LENGTH ZIPPER ACCESS
- INTERIOR ORGANIZATION POCKETS
- DOUBLES AS PADDED SEAT AND GEAR BAG

#36410016

**SURF SUIT PROGRESSIVE**  
5'6" x 22" x 1.5" ( 170CM x 50CM x 4CM )

- FITS PROGRESSIVE BOARD SHAPES UP TO 5'6"
- COLLAPSABLE DESIGN ACCOMODATES FINS
- HANDS-FREE CARRYING WITH SHOULDER STRAP
- INTERIOR FIN POCKET

#36410013

**SURF SUIT CLASSIC**  
6'3" x 22" x 1.5" ( 190CM x 56CM x 4CM )

- FITS SURFBOARD SHAPES UP TO 6'3"
- COLLAPSABLE DESIGN ACCOMODATES FINS
- HANDS-FREE CARRYING WITH SHOULDER STRAP
- INTERIOR FIN POCKET

#36410014

**SURF COFFIN**  
6'3" x 22" x 6" ( 190CM X 56CM X 15.3CM )

- CAPABLE OF HOLDING THREE 6'3" SURFBOARDS
- INTERIOR FIN AND TOOL ORGANIZERS
- PADDED/REMOVEABLE SHOULDER STRAP
- CONVENIENT, DURABLE AND LIGHTWEIGHT DESIGN

#36410017

## TRAVEL BAGS

### TACTICAL TROLLEY

( 5'2" x 20.5" x 15.75" ( 158CM x 52CM x 40CM )

- FITS MULTIPLE BOARDS UP TO 158CM
- SEPERATE WET GEAR COMARTMENT
- INTERIOR FIN AND TOOL COMPARTMENTS
- PADDED DIVIDER / RUGGEDED URETHANE WHEELS

#36410015

### BEACH TOTE

( 40CM x 47CM x 20CM )

- ZIPPERED MAIN COMPARTMENT
- EXTERIOR ZIPPERED COMPARTMENT
- KEEP BEACH ESSENTIALS CLEAN AND SAND FREE
- INTERIOR KEY RING

#38410021

### DOWNLOAD PACK

( 53CM x 33CM x 24CM )

- OVERNIGHT ROLLER NAG / BACKPACK
- USE OR STASH BACK PACK STRAPS
- INTERIOR CAMERA / LENSE ORGANIZATION
- RUGGEDED URETHANE WHEELS

#38410018

### BEER RUNNER

( 38CM x 22CM x 18CM )

- FITS UP TO A 12 PACK
- CONVENENT BEER/DRINK COOLER
- REMOVEABLE SHOULDER STRAP

## VESTS

**ATLAS (WINE)**  
#38201

- CUSHY IMPACT PROTECTION
- MADE FROM HIGH END LIMESTONE BASED NEOPRENE
- NEW WINDSKIN CONSTRUCTION
- SINGLE BUCKLE

S / M / L / XL

**FELIX VEST**  
#38205

- FELIX GEORGII PRO-MODEL
- MADE FROM HIGH END LIMESTONE BASED NEOPRENE
- LOW PROFILE FOAM PROVIDES MAXIMUM FREEDOM
- NEW WINDSKIN CONSTRUCTION

S / M / L / XL

**EMPAX (KITE)**  
#38018

- FRONT ZIP ENTRY
- ISOLATED KEYS AREAS OF FOAM
- PROVEN MAXIMUM IMPACT PROTECTION
- COMPATIBLE WITH ALL HARNESSSES

S / M / L / XL

**SHREDTOWN (BLACK)**  
#38204

- SHREDTOWN PRO-MODEL
- FRONT ZIP ENTRY
- DUAL BUCKLE CLOSURE / SNAPS
- \*NEW WINDSKIN CHEST AND BACK PANEL

S / M / L / XL

**SHREDTOWN (CYPRESS)**  
#38203

- SHREDTOWN PRO-MODEL
- FRONT ZIP ENTRY
- DUAL BUCKLE CLOSURE / SNAPS
- MADE FROM HIGH END LIMESTONE BASED NEOPRENE

S / M / L / XL

## FOIL

Nothing says “Ride What You Can’t” like foiling. It’s the ultimate middle finger to convention. Foiling breaks all the rules of what we thought was possible in the waves. Foiling lets us ride the un-ridable. Surf the un-surfable. Shred the un-shredable. Foiling means more fun in more places, more often.

For these reasons, we have become obsessed and the new foil range from Ride Engine reflects that obsession. More wings, more technology, means more fun for you and, to be honest, us as well.

FUTURA SURF FOIL (#39020002)

The Futura Surf Foil is package is designed to deliver the best of both worlds- plenty of lift and early takeoff for catching even the smallest rolling waves AND enough speed and glide to carve waves without having to continuously pump to keep up. The magic is in the Futura's Manta 76 wing, which has a large, low-aspect shape that is super stable and user-friendly and an Inverted Gull Wing outline that gives it much better top-end performance than many foils of similar size and surface area.

HIGHLIGHTS:

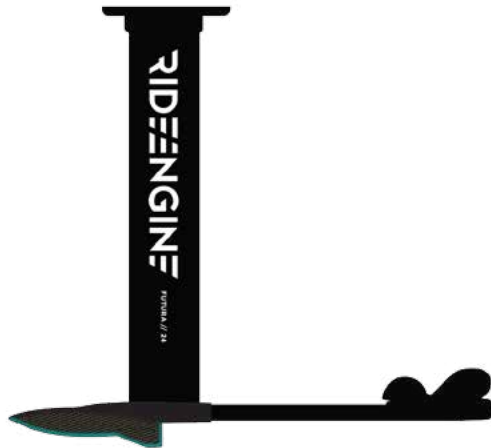

- A package designed for user-friendly surf foiling success
- New carbon composite construction- lighter, more range and more efficient
- Manta 76 wing is high lift, stable, early takeoff
- Safe-T winglets help prevent injury
- 24” mast ideal length for tapping into energy of the waves
- Modular system compatible with all other Ride Engine wings

PACKAGE INCLUDES:

- 24” MAST
- MANTA 76 FRONT WING
- 42cm REAR WING, & SHIM
- CUSTOM TRAVEL BAG
- PEDESTAL MOUNT
- FUSELAGE
- ALL HARDWARE

TRAVEL BAG INCLUDED\* (#38020018)

FUTURA SUP FOIL (#39020001)

Escape the crowds, explore new breaks and surf even the smallest days with a SUP foil package designed to maximize lift, stability and gliding and eliminate the frustration of not being able to catch or keep up with waves. The Futura SUP foil package comes with our new Manta 84 wing. This is a unique big-wing design that gives you the best of both worlds- the lift and bottom-end performance needed get a heavier SUP board on-foil and cruising on AND the range and top-end handling you want once you’re up to speed.

HIGHLIGHTS:

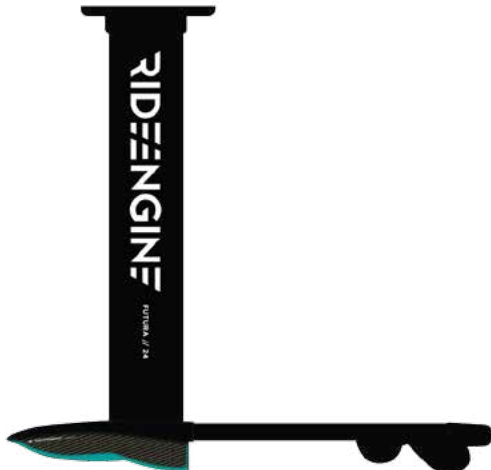

- The best package for user-friendly SUP surfing
- New carbon composite construction- lighter, more range and more efficient
- Larger 48 rear wing increases stability and locked-in carving
- Unique fuselage has different connection points for different performance
- 24” mast ideal length for tapping into energy of the waves
- Modular system compatible with all other Ride Engine wings

PACKAGE INCLUDES:

- 24” MAST
- MANTA 84 FRONT WING
- 48cm REAR WING, & SHIM
- CUSTOM TRAVEL BAG
- PEDESTAL MOUNT
- FUSELAGE
- ALL HARDWARE

TRAVEL BAG INCLUDED\* (#38020018)

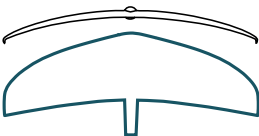

FOIL WINGS

ARC  
#39020020

- Carves wider in the turns and slows your speed down
- Great choice for bigger head-high waves where controllin and dumping speed is necessary
- New carbon composite construction - lighter, more range and more efficient
- Safe-T winglets help prevent injury

SURFACE AREA: 1101 cm2  
SPAN: 678mm  
CHORD: 185mm  
ASPECT RATIO: 2.11  
WEIGHT: 1.5kgs

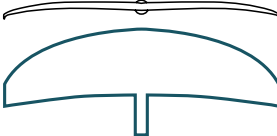

PERFORMANCE CHARACTERISTICS:

STABILITY: 4  
TURNING: 7  
LIFT: 6  
WAVE ENERGY: HIGH

COLUGO  
#39020027

- Stable, user-friendly wing for easy cruising on tiny to medium size waves
- Flat shape is super stable, long, drawn-out carving like a longboard
- New carbon composite construction - lighter, more range and more efficient
- Safe-T winglets help prevent injury

SURFACE AREA: 960 cm2  
SPAN: 688mm  
CHORD: 170mm  
ASPECT RATIO: 2.38  
WEIGHT: 1.4kgs

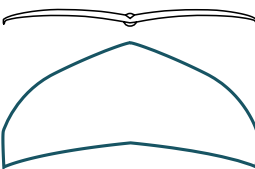

PERFORMANCE CHARACTERISTICS:

STABILITY: 9  
TURNING: 5  
LIFT: 8  
WAVE ENERGY: MEDIUM

BAT WING  
#39020019

- High surface area, low aspect wing has tons of lift and range for tiny to head-high waves
- Arc “Bat Wing” shape gives it dynamic, self-centering carving and turning
- New carbon composite construction - lighter, more range and more efficient
- Safe-T winglets help prevent injury

SURFACE AREA: 1504 cm2  
SPAN: 652mm  
CHORD: 275mm  
ASPECT RATIO: 1.43  
WEIGHT: 1.55kgs

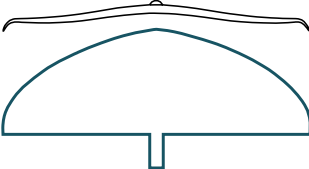

PERFORMANCE CHARACTERISTICS:

STABILITY: 7  
TURNING: 10  
LIFT: 7  
WAVE ENERGY: MEDIUM

MANTA 76  
#39020026

- Manta 76 wing is high lift, stable, early takeoff
- Inverted gull wing shape gives great lift but also better top end performance than wings of a similar size
- New carbon composite construction - lighter, more range and more efficient
- Safe-T winglets help prevent injury

SURFACE AREA: 1534 cm2  
SPAN: 765mm  
CHORD: 262mm  
ASPECT RATIO: 1.92  
WEIGHT: 1.7kgs

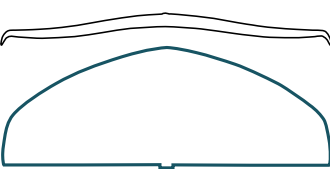

PERFORMANCE CHARACTERISTICS:

STABILITY: 10  
TURNING: 7  
LIFT: 9  
WAVE ENERGY: LOW

MANTA 84  
#39020025

- Unique Big Wing design for Maximum lift and stability
- Inverted gull wing shape gives great lift but also better top end performance than wings of a similar size
- New carbon composite construction - lighter, more range and more efficient
- Safe-T winglets help prevent injury

SURFACE AREA: 2066 cm2  
SPAN: 838mm  
CHORD: 304mm  
ASPECT RATIO: 1.73  
WEIGHT: 2.5kgs

PERFORMANCE CHARACTERISTICS:

STABILITY: 10  
TURNING: 6  
LIFT: 10  
WAVE ENERGY: LOW

## ACCESSORIES

### CHANGING MAT

- KEEPS YOUR WETSUIT CLEAN/PROTECTED
- KEEPS YOUR VEHICLE CLEAN, DRY AND SAND FREE
- DRAWS CLOSED TO CONTAIN WET GEAR
- MADE FROM RUGGED POLYESTER

SKU #36410018

### JEDI ROBE

- ONE SIZE FITS ALL
- COMFORTABLE FOR LOUNGING
- HOOD BLOCKS WIND AND SUN
- KNEE LENGTH PULLOVER KEEPS YOU COVERED

SKU #36410019

### ROOF RACK PADS

- 71CM SIZE, FITS MOST LARGE FLAT OR WING RACKS
- ALLOWS FOR TIGHT, SECURE MOUNTING
- A NECESSITY FOR ANY ROAD TRIP
- MADE FROM RUGGED 420D POLYESTER

SKU #36410020

### ROOF RACK STRAPS

- MULTI-PURPOSE STRAPS - 16 FOOT LENGTH (4.9M)
- CAMS HOLD TIGHT, WON'T LOOSEN OVER TIME
- PADDED BUCKLE PREVENTS DENTS AND SCRATCHES
- CARRYING CASE UNCLUDED

SKU #36410021

### SURF TRACTION PAD

- 12MM ARCH, 32MM TAIL
- HIGH DENSITY EVA FOAM
- SHAPE FAVORS AGGRESSIVE GRIP AND RIDING
- EASY PEEL AND STICK APPLICATION

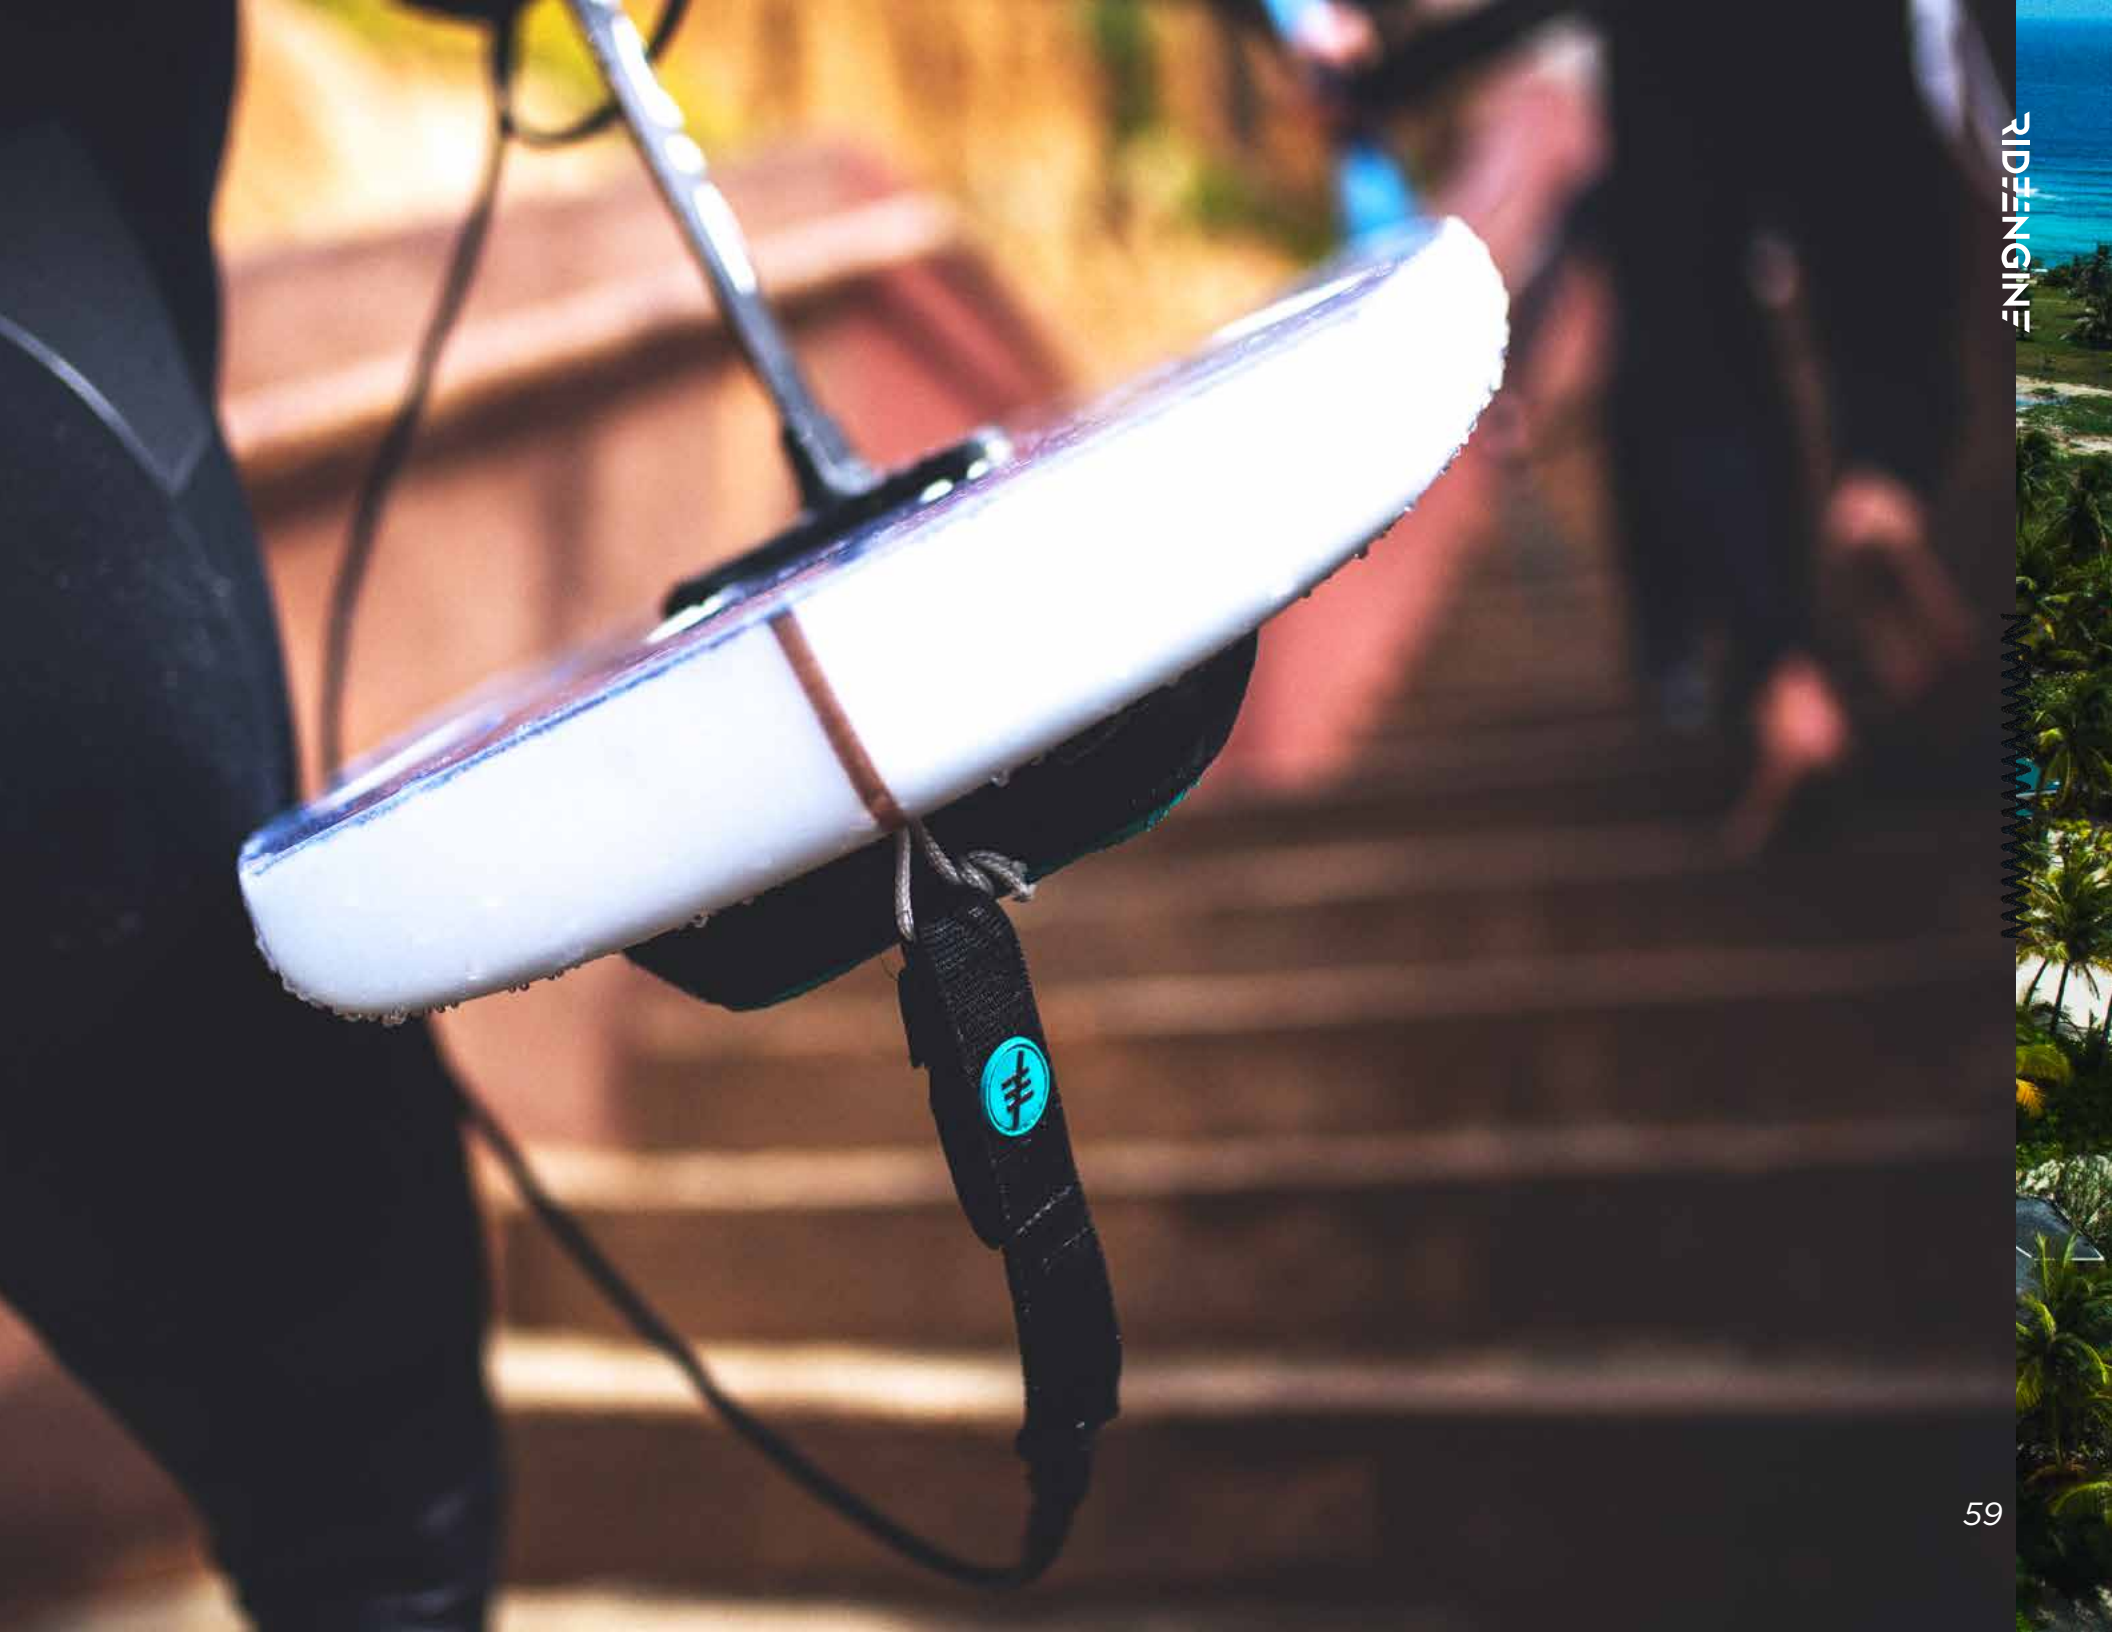

SKU #36410022

### KITE KNIFE

- FOR WHEN IT REALLY HITS THE FAN

SKU #36900002
